### DETAILED ACTION

1. The enclosed detailed action is in response to the Information Disclosure Statement submitted on April 8, 2002.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 4-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Gamache et al. (USPN: 6,453,426).

Regarding claims 1, 4 and 6-7, Gamache discloses (a) identifying at least one second data set [core boot data] from which the first data set [configuration data] is to be separated (C 10, L 14-16); (b) identifying any of the plurality of storage resources and any volume thereof that contains the second data set (C 10, L 1-4); and (c) forming an eligible volume list [group node preference list, specifically the mirrored storage devices within the listed nodes] for selection of the first storage resource according to a policy [policy which dictates a node's preference] such that any storage volume identified by step (b) is excluded from the list [in each node, the core boot data is only stored within the quorum storage region [quorum storage devices] and thus the eligible list of mirrored storage devices indirectly listed via its corresponding node does not include the storage region which contains the core boot data], whereby a failure in a storage resource that

Art Unit: 2187

contains the first storage volume or any storage resource identified by step (b) has a minimal impact on the other thereof (C 9, L 26-27, L 44-51).

Regarding claim 5, Gamache discloses (d) selecting the first storage volume from the eligible volume list (C 9, L 26-27).

***Allowable Subject Matter***

4. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
